

Stainless Steel Hand Type Impulse Sealer

Z-300DX

- Impulse sealing with plug-in electronic timer.
- Sealer can be operated either on the table or hung on the wall (to serve as a vertical sealer).
 - Available in 12" sealing length.
 - Sealing width: 2.7mm
- Suitable for sealing solids or liquids.
 - Rust-proof
- Ideal for use in the food, medical industry, or any other clean room environment.

Z-300DX is a stainless steel hand sealer. It can be used as a tabletop sealer or it can be wall-mounted for vertical sealing. It is ideal for sealing powders and liquids in the wall-mounted configuration because the liquid/power cannot escape from a bag that is being sealed upright (see picture below. Z-300DX also has a rust-proof body and a stainless steel platform.

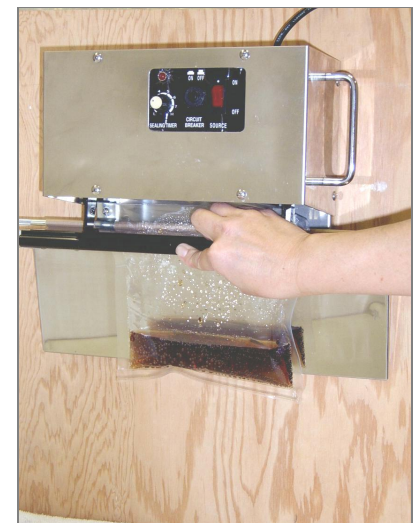

The machine seals poly bags & any thermoplastic material quickly and efficiently without one having to wait for a warm-up time. The machine will seal material up to 12" wide & 10 mil total thickness. The seal width is 2.7mm. It is equipped with a plug-in electronic timer. The timer controls the different sealing times needed for the varying thickness of materials. Once the timer is set, it will give a consistently flat seal. It is recommended that the user hold the seal bar down for a few seconds more after that light goes out to ensure enough time for the seal to cool and set.

Easy to Operate:

Simply set the timer; insert the bag between the sealing bars. Hold your bag with both hands and at the same time; use your hands to press against the worktable surface which presses the upper seal bar to seal your bag. After the timer light goes out, release the pressure applied to the worktable.

If you are sealing heavier mil thickness bags, it is recommended that you include a longer congealing time. The congealing time will give the seal a chance to cool and set. If you include an extra 2 seconds for the congeal time after the timer light goes out, the bag will have a perfect seal.

Power Supply	110V	Max Sealing (L x W)	12" x 2.7mm
Power (watt)	380w	Weight	15.4 lbs.
Heating Time	0-2secs.	Dimensions (L x W x H)	12.6" x 13.4" x 6.7"

Sealing liquid with vertical sealing.
