

FOOT-OPERATED *Sealers*

FS-SERIES

Foot-operated impulse sealers are ideal for high volume poly bag & other thermoplastic sealing. The sealers are capable of sealing 15-20 bags per minute. These sealers allow you to keep both hands free for quicker and more accurate sealing. The machines are also equipped with a plug-in timer which controls the sealing time needed for different materials. Once the timer is set, it will give a consistently flat seal. When seal is done, the sealer will automatically beep or the signal light on timer will turn off.

FS Foot Sealer Series are light blue in color & are available in 14", 18" & 26" with a 8mm seal width. Depending on the model of the sealer, materials up to 26" wide and a total thickness of 20 mil can be sealed. The sealers include 26" pedestal, a 2" base, an adjustable work table, and an adjustable foot control. The manufacturer's replacement kit includes 2 heating elements, a sheet of Teflon cloth & tools. Elements are easily replaceable due to the clip type element holder.

Easy to operate:

Set the timer. Insert the bag between the sealing bars, press down on the foot board, & release the pedal after timer light turns off. To enhance the appearance of the seal, hold the pedal down for an extra 2 seconds after the timer light goes off.

Model	Seal Length	Seal Width	Impulse Power	Weight
FS-358F	14"	8mm	600w	63lbs.
FS-458F	18"	8mm	800w	65lbs.
FS-658F	26"	8mm	1000w	68lbs.
