- Quiet operation
- Quad locking casters
- Adjustable leg height
- Electronic tension control
- Stainless steel table top
- Safety switch

Introducing our **SM-11 semi-automatic strapping machine** built to streamline your packaging workflow. From bundling to boxing, this machine handles every task with ease and efficiency ensuring your packages are securely strapped. Process automatically begins when the operator inserts strapping into the machine. Safety switch cuts power when the lid is open to protect the operator. As an added bonus, the machine utilizes two direct drive 24VDC motors to provide a nearly silent operation.
