More Details:

Our Shrink Wrapping Starter Kits are an easy and cost effective way to get started.

Shrink Wrapping provides your package with a crystal clear tamper proof package. Shrink wrapping will protect your package from moisture and dust. Easily re-shrink products that have been opened and your product is like new again. To shrink wrap, all you need is shrink material (film or bags), sealer to seal (hand, I-Bar, or L-Bar), and a heat source to shrink (heat gun or shrink tunnel).

Easy to operate: Simply insert product in the shrink bag. Seal and cut the shrink bag by lowering the seal arm. Use the heat gun to shrink the bag around your product.
