

## Semi-automatic for consistent seals

- Impulse Sealing – no warm up time needed
- Consistent sealing and congealing
- Sealing activated via foot switch
- Plug-in electronic timer
- All metal construction
- Sealing jaws will open when seal is complete

### More Details:

WN-450S is an automatic foot impulse sealer ideal for high volume poly bag and other thermoplastic sealing. The unit is capable of 15-20 seals/minute. This sealer allows you to keep both hands free for quicker and more accurate sealing. The unit operates on impulse sealing and is controlled by a circuit board. Once correct settings have been established, consistent seals will be maintained automatically. The larger electro magnet allows continuous operation for heavy duty applications.

### OPERATION

Set the sealing (heat) and congealing (cool) settings. Insert material between the sealing jaws and press on the foot pedal switch to activate the sealer. The sealer will go through the sealing and congealing process. The sealing jaw opens automatically when sealing is complete.

\*\*Semi-automatic operation - Sealing time and congealing time are electronically controlled for consistency to be maintained.

### Features:

Power Supply	110V / 50Hz
Watts	600W
Seal Length	18"
Seal Width	2.7mm
Weight	60-lbs
Dimensions (L x W x H)	21" x 13" x 35"
