

# Hot Melt INK ROLLS

Our **Hot Melt Ink Rolls** are specialized foam rolls that are friction loaded with a variety of hot melt inks for use in our dry ink continuous band sealers. Our ink rollers can perform from 200°F-325°F (93°C-163°C). We offer two different sizes, 15mm and 30mm, as well as four different colors: black, blue, red, and yellow. Under normal operating conditions, a roll should provide approximately 70,000-80,000 but this will vary significantly by number of lines, characters of print, and temperature used during printing.

For use with our band sealer models, HL-M810 and FRM-1120 series.

SPECIFICATIONS	IT-IR-15	IT-IR-30
Roller Height	0.625" / 15mm	1.259" / 30mm
Roller O.D.	1.40" / 36mm	1.40" / 36mm
Roller I.D.	.44" / 11mm	.44" / 11mm
