

Manual Overwrapper FOR CDS, DVDS, ETC

FEATURES

- Hand operated
- Can seal virtually any type of carton
- Provides professional packaging
- Smallest overwrapping machine on the market
- Ideal for smaller production sizes
- Lightweight and portable
- Simple and easy to operate

Our **WB-300** manual overwrapping machine wraps flexible packaging material around your carton, box, CD, or DVD case. The WB-300 requires pre-cut film for your package, but can overwrap almost any media case overwrapping. This manual overwrapping machine can also be used for the perfume, cosmetics or tea packaging industry.

The WB-300 can overwrap any package up to 11.8". No need to have a second overwrapping machine for another size or type of case. WB-300 offers three different temperature settings for various material thickness. WB-300 requires a 7-10 minute warm up time

Overwrapping provides many advantages

- Tamper evidence
- Product appeal
- Product protection
- Packaging waste reduction
