

# PORTABLE T-CLAMP IMPULSE

FKR-A SERIES SEALERS

sealersales

## Value Unit - Lightweight & Compact

- Available in 8", 12", and 16" seal lengths
- Lightweight and easy to operate
- Equipped with timer for precision heat control
- Double impulse - two heating elements
- Recommended for poly materials such as polyethylene, polypropylene, PVC, PE, laminated paper and foil

Introducing the **FKR-A Series Portable T-Clamp Impulse Sealers**—compact, user-friendly sealers designed for versatile sealing applications. These sealers are offered in three convenient sizes: 8 inches, 12 inches, and 16 inches, catering to various sealing requirements. Perfect for sealing polyethylene and laminated foils, the FKR-A series excels in applications involving the sealing of irregularly shaped items, such as drum or box liners, and effortlessly accommodates sealing around larger objects. The inclusion of dual heat functionality empowers the sealer to handle thicker materials with ease.

Operational simplicity is a hallmark of the FKR-A Series. To achieve a secure seal, the operator positions the item between the jaws and applies pressure to the handle. A built-in indicator light on the main housing unit signals the completion of the seal cycle. For optimal results, we recommend maintaining pressure on the jaws for an additional 1-2 seconds after the light turns off. The heat cycle is controlled by an adjustable timer, allowing the operator to customize settings according to the specific sealing requirements.

SPECIFICATIONS	FKR-200A	FKR-300A	FKR-400A
