

100% PE Recyclable – How2Recycle Program

- Standard & high barrier options
- Unique structure for superior strength & stiffness
- Exceptional clarity for clear window display
- Surface and reverse rotogravure printing with gloss, matte or partial matte finishes
- Convenience features include press-to-close zippers, hang holes, or tear notches

More Details:

Currently, most multi-layer pouches are not recyclable but we now offer a 100% PE recyclable laminate that is pre-approved for members of How2Recycle's in-store drop off label program. Engineered to offer superior strength and stiffness, our material can offer a sustainable solution while delivering the same protection and performance as traditional flexible barrier materials.

- Approved by the SPC's How2Recycle label program for recycling through in-store drop-off and designed for recycling streams
- Available in various formats: stand up pouches, flat bottom pouches and gusseted bags
- Superior stiffness and exceptional clarity to enhance brand presentation on the shelf
- Enhance consumer convenience with straight and easy tearing, without the added cost of laser scoring
- Ideal application for many food and home care products – FDA complaint for direct food contact
- Custom features available
