

## Patented instant heating performance

The SM-400 Semi-Automatic Strapping Machine is a general purpose strapping machine that can strap packages quickly and efficiently. Strapping cycle will automatically start when operator inserts strapping. This unit incorporates an electro magnetic censoring system that guarantees both lighter and stronger tension ranges than with the conventional trip arm system.

### Standard Features:

- Instant heating performance
- Magnetic tension detector (up to 100lbs)
- Adjustable cooling time
- Uses 3/8" or 1/2" strap
- Automatic motor shut off
- Auto shut off and cool time adjustment
- Easy to lift table top
- Adjustable table height
- 1/4HP motor drive
- Automatic strap feed length adjustment

SPECIFICATIONS	
VOLTAGE	110V/60Hz
POWER	650W
DRIVING MOTOR	SINGLE PHASE; 1/4HP
MAXIMUM TENSION	60KGS
STRAP WIDTH	6MM-15MM
MINIMUM PACKAGE SIZE	60MM
STRAPPING SPEED	1.5SEC/STRAP
DIMENSIONS (L X W X H)	36" X 23" X 30"
WEIGHT	220-LBS
