

Ideal for special bags w/ extra material above seal line

Our UHSSDC-series of portable t-clamp sealers is ideal for sealing special bags with extra material above the seal such as handles. As with our other portable t-clamp sealers, this unit will seal many materials including polyethylene, polypropylene and co-extruded film.

**MADE IN THE USA**

## Features:

- Easy to operate
- Lightweight
- 6" deep clearance for larger capacity above the seal line
- Seal width: 1/4"
- Seal length: 4", 8", 12"
- Single digital heat timer (easy to adjust and superior timing control)
- Thermal impulse seal
- Adjustable heat time (increments of 1/10th of a second)
- Spring loaded operation (closed-position)
- Push button activated (located on upper Handle)
- Master on & off switch
- 1"-2" clearance between upper and lower seal jaws
- 6ft. cord between handle and control box
- Anodized aluminum handle
- Open through design
- Special order with lead time of 4-5 weeks

## Options:

- Temperature controller
- HMI (PLC touch screen controller)
- Dual heat
- 3/8" wide heating element
- 1/2" wide heating element
- Multi-elements
- Seal and cut
- Single or dual switch
- Water cooled seal jaws
- Water chiller
- 220V, single phase, 50-60Hz
